

Environmental Policy

In Qatar Power Company, which owns and operates the Independent Water and Power Plant inside Ras Laffan Industrial city with the capacity of 1025 MW Power and 60 MIGD of potable water, everyone is responsible for protecting and enhancing the environment with sound environmental management practices.

We are committed to

- a. Comply with all applicable environmental laws and regulations, Appendix 11 of the PWPA which specifies the environmental requirements for this plant.
- b. Prevent pollution through cost effective measures, reuse and recycle of used materials and handle and dispose of the waste materials in ways that minimise the environmental impact.
- c. Encourage active employee participation in environment protection.
- d. Conserve energy, raw materials, and natural resources.
- e. Identify and review the environmental aspects of our activities and set up environmental objectives with measurable environmental targets.
- f. Devote adequate resources to develop appropriate programmes and procedures for implementation of this policy.
- g. Make prudent selections of environment friendly practices and materials whenever possible.
- h. Communicate this policy and our environmental values to the interested parties.
- i. Audit and maintain Environmental Management System and its certification to ISO 14001:2015 standard.
- j. Review conformity with this environmental policy on a regular basis to ensure compliance and provide opportunity for continual improvement in environment performance and report the same honestly and openly.

Fawaz Al Baker
Executive Managing Director
Qatar Power Company
